

# PRESUMPTIVE CHARITY SCORING

- Ensure your patients are getting the financial assistance they need
- Reduce paperwork for the patient and your staff
- Better public relations within the communities you serve
- Help retain your non-profit status
- Concentrate collection efforts on the consumers that have the ability to pay

**Lower your bad debt and increase your charity dollars without the risk of your bad debt revenue decreasing!**

CCB's presumptive scoring combines external (FPG) Federal Poverty Guideline % Score with a customized Propensity to Pay Score. The algorithm also ensures that the consumer has not made any recent payments to CCB.

**FPG Score:** Is derived from external database that utilizes demographics, public record info, median household income, and average household size.

**Propensity to Pay Score:** Is derived from CCB's internal database, and Trans Union databases. The customized scores are then utilized to scrub your placements and return any accounts that fall within the appropriate presumptive charity parameters.

This can be done pre or post bad debt.

**Please contact us for a rate quote.**
